	<b>PBI-MultipleFiles</b>								
	<b>As an election official</b> I want to be able to bring in files from different balloting locations So that I can run an election with mutiple balloting locations  <b>Acceptance Criteria:</b> Multiple files can be read for all election types; The elections are fair; The format of the files are .csv.  <b>Definition of Done:</b> Unit testing passes all cases for all election types; System Testing passes all cases for all election types; Regression Testing passes; Tests are documented; Code is documented.  <b>Effort:</b> Medium - 4 to 5 hours <b>PBI Author(s):</b> Josh Trimble								
								Josh design - 30 min	Caden: user documentation - 15 min
								Josh code - 2 hours	Roman regression testing - 15 min
								Caden: unit testing - 1 hour	Roman system testing - 45 min
								Mo analyze - 15min	
	<b>PBI-IRVHalfFilledBallot</b>								

<b>As an election official</b> I want to be able to invalidate ballots so invalid ballots will not be counted in the election.  <b>Acceptance Criteria:</b> Invalidated ballots must be removed from the election when the software is run; A file must be created that stores the invalidated ballots for audit purposes; The name of the file should be invalidated_dateofelection.xxx; Election must be fair for all candidates; .5 or more candidates must be selected for the election;  <b>Definition of Done:</b> Unit testing and system testing pass for the requirement; Regression testing passes; Changes to the code and test cases are documented; Code is deployed to test enviornment.  <b>Effort:</b> Medium 4 to 5 hours  <b>PBI Author(s):</b> Myat Mo								
							Mo design - 1 hour	Mo code - 30 min
						Josh analyze - 10 min	Caden system testing - 1 hour	Mo unit testing - 1 hours
						Caden: regression testing - 20 min		Caden: user documentation - 10 min
PBI-PO.CSV								

	<p><b>As an election official.</b> I want to be able to send popularity-only ballots to be processed in my voting software.</p> <p><b>Acceptance Criteria:</b> Ballot information must be organized into a single CSV file of the following format: First line contains only "PO" for Popularity Only, Second line contains the Number of Candidates, Third line lists the candidates and their party with name and party separated by commas, The fourth line contains the number of ballots.</p> <p><b>Definition of Done:</b> Unit testing passes all cases for all election types; System Testing passes all cases for all election types; Regression Testing passes; Tests are documented; Code is documented.</p> <p><b>Effort:</b> Medium 5 to 6 hours</p> <p><b>PBI Author(s):</b> Roman Woolery</p>							
					Roman system regression testing - 10 min	Mo PO class code - 1 hour	Josh design for load file - 30 min	
			user documentation load file - 15 min		Roman user documentation PO class - 15 min	Mo design for PO class - 30 min	Josh loadfile code - 1 hour	
							Roman system testing - 1 hour	
			analyze main functions - 15 min					
			analyze PO class - 15 min					
			unit test PO class - 30 min
